

netassure  
from NetComm®

Keep your Internet and business safe,  
secure and under control

Does your network sometimes slow to a crawl?

Do you offer unlimited Internet access to your staff?

Do you know what your staff are doing on your Internet connection at all times?

Are you losing control of your data expenditure on a monthly basis?

If any of these situations are affecting your business and its day to day operations then read on!

The NetAssure Internet Productivity Service is a single solution for all of your internet network management needs, offering:

- Firewalling and intrusion detection to protect your network from outside forces
- Content filtering to limit large downloads and non core business activities such as Facebook and YouTube
- A simple way to connect your offices together should you need to share applications and confidential information such as accounting, payroll and CRM
- 24/7 monitoring of your Internet and network with real time reporting on whatever criteria you need such as usage, billing, type of traffic etc.
- Alerts you of excessive data usage, or when you come close to your monthly ISP quota.

With the ability to work with your current internet service and without the need for any technical installation or configuration, NetAssure can be installed and running in your business within 30 minutes.

NetAssure is based on a monthly subscription starting from **\$164.00 per month** with no upfront investment and is an essential tool to connect, protect and control your business.

For more information or to see first-hand how NetAssure will benefit your business with our 30-day free trial, contact NetAssure.
